Progress Report

Children's Service's Plan

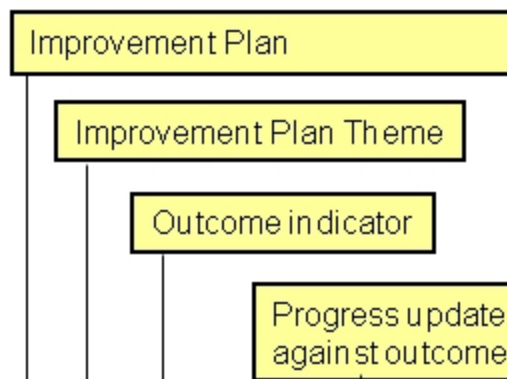

Quarter 4 - 2018-19

getting it right

for every child
in South Lanarkshire

How to use this performance report

This performance report is intended to be both informative and easy to use. The guide below is designed to help you get the most out of the report and to answer the most common questions you might have.

Measure Status – are we on course to achieve?
The "traffic light" codes are:

- Green Achieved, or due to achieve with no issues
- Amber There may be problems or minor slippage
- Red Not on course, major slippage anticipated

Measures which are to be reported later or which are "for information only" are not colour coded

Community Planning Partnership - SOA 2013-2023									
Tackling Poverty									
Medium to Long Term Outcomes (Priority Outcomes)									
Outcome Indicator	Comments	Status	--- BASELINE ---		--- LATEST ---		----- TARGETS		
			Data	Period	Data	Period	Annual	Med (3 yr)	Long (10 yr)
REDUCE gender pay gap (three year average)	This measure has not been amended since 2010 as updated statistics are not yet available from the original sources, Scottish Neighbourhood Statistics (SNS).	Report Later	11.0%	2010	11.0%	2010	N/A	Reduce to at least 7%	Reduce to below Scottish average
REDUCE % of the population who are income deprived.	Statistics not available until the next Scottish Index of Multiple Deprivation (SIMD) (2015) - results from the SIMD 2015 will be available from August 2016.	Report Later	14.0%	2012	14.0%	2012	N/A	Reduce South Lanarkshire percentage to 12%	Reduce South Lanarkshire percentage to 10%
REDUCE % of the population aged 16 to 64 years old in receipt of out of work benefits.	Target achieved. Percentage of the 16-64 population in South Lanarkshire in receipt of DWP Out-of-Work benefits is 11.7% at May 2015 - 1.3% below the medium term target of 13%. Ongoing effective partnership activity to support residents into employment particularly the young and those with significant barriers is contributing to this outcome.	Green	14.9%	2012	11.7%	2015	N/A	Reduce South Lanarkshire percentage to 13%	Maintain at or below the Scottish average
REDUCE % of population with low/no qualifications	No update of this information available from the original source (Scottish Neighbourhood Statistics) from 2013.	Report Later	14.7%	2010	13.1%	2013	N/A	Reduce to 13%	Reduce to 10%

				Data	Period	Short (1 yr)	Med (3 yr)	Long (10 yr)
01.02.02 Continue with initiatives to increase uptake of Free School Meals including automatic award for pupils entitled to Free School Meals	<p>Current work around Free School Meals has led to an automatic award for those pupils in P4 to S6 who are entitled to this benefit.</p> <p>There continues to be a focus on ensuring those who had previously claimed Free School Meals continue to access the award.</p> <p>The uptake rate currently sits at 6910 children and includes approximately 4,500 pupils who were previous applicants and circumstances were unchanged from one academic year to the next so they have benefited from the automatic award.</p> <p>Actions by Education Resources to encourage the uptake of Free School Meals have included the auto entitlement arrangements, Information provided for parents to raise the awareness of Free School Meals and School Clothing Grants entitlements as well as an increase focus on the concept of the cost of the school day. All school establishments are working on a position statement around the cost of the school day, which will include actions to encourage pupils stay in school for lunch.</p> <p>Dedicated staff time has been allocated to a strategic approach to supporting schools with approaches to cost of the school day activities.</p>	Green	---	---	---	---	---	---
01.02.03 Percentage of Free School Meals uptake by P4-S6	<p>There were 6302 free school meals awarded for P4-S6 in the current academic year.</p> <p>There were 190 free school meals awards rejected for pupils in P4 –S6 which makes the current uptake approximately 97% an increase on last year's figure of 82%</p>	Green		97.0%	2019

01.02.04 Health Visiting Teams and Social Work Family Support Teams will work in partnership with the financial inclusion sector to roll out successful work to support the financial wellbeing of pregnant women and low income families	<p>The financial well-being improvement work has now been scaled up across South Lanarkshire Health Visiting (HV) Teams and combined with midwifery services.</p> <p>A routine enquiry approach has been adopted by HV and Midwives to raise the issue of money worries with clients at all assessment contact points in HV and at 2 key contacts in Maternity. A reporting system is being developed within Midis and Badger to record routine enquiry contacts to allow us track the system process.</p> <p>In the reporting period April 2018-February 2019 there were 845 referrals from Midwives and Health Visitors into the Telephone Advice Line, a 37% increase from the previous year, with 79% of families engaging with the service.</p> <p>Highlights of note has been the participation of South Lanarkshire in the national campaign videos on the NHS Education Service website and the project reaching the finals of the National Quality awards.</p> <p>Overall, there has been an identified financial outcome gain of £95,995 for a sample of 20 families, similar to the successes of last year.</p> <p>In addition we have begun to stratify our data into the priority groups as part of our developments around the Child Poverty Action Report duty. The data profile in the period April 2018-January 2019 demonstrates 14.6% of referrals where the parent has a disability, 8.7% where the child had a disability, 43.5% loan parents, 5.2% in households with 3 or more children, 22% of households with a child under one and 22.9% of households where parents were under 25.</p> <p>In addition to the specific referrals to Money Matters Telephone Advice Line from Health Visitors and other statutory services our third sector partners have been working with service users to offer a range of supports to parents/carers and families, including:</p> <ol style="list-style-type: none"> 1. Community Links provides 8 Select Hubs offering support regarding Universal Credit. 2. COVEY works with parent/carers on low income supporting them to access CAB services and 	Green	---	---	---	---	---	---	---

THEME 1: Prevention and early support - Children have the best start in life and are supported to realise their potential

Measure/Actions (Actions shaded Grey)	Comments	Status	--- LATEST ---			---- TARGETS ----		
			Baseline	Data	Period	Short (1 yr)	Med (3 yr)	Long (10 yr)
01.03.02 At 12 - 15 months all children with concern have a support package / outcome plan in place	<p>Speech and Language Therapy(SLT) staff have been collaborating with Early Learning and Childcare Practitioners to deliver 'Hanan Training' (Fostering language development in early year's settings) within the four localities. A total of 100 places have been offered to early year's establishments across South Lanarkshire This training aims to develop confidence and skills in the early year's workforce to support early language development.</p> <p>This compliments the established early year's literacy training delivered collaboratively with educational psychology which SLT contributes to in relation to the development of vocabulary and phonological awareness skills.</p> <p>Speech and Language Therapy services have been co-located to early year's sites with increased risk of SLCN. SLTs are now co-located to 8 Early Years establishments in (SIMD1/2) in South Lanarkshire providing advice, support and clinics on site.</p> <p>Improvement work continues to focus on an early intervention tool used by Health Visitors to address early identification and intervention for speech and language concerns at 27-30 months and reduce the need/demand for specialist interventions. SLT are delivering a series of workshops to Health Visitors to promote understanding of the key concepts around early intervention for children with speech, language and communication concerns alongside promotion of a national resource for Health Visitors to support their learning and development requirements. Later this year we will review the impact of this work on children who have received this intervention at their 4 year old review.</p> <p>The SLT service is continuing to develop its universal and targeted services to ensure that any concerns can be addressed early. This has included testing an early language workshop for parents and development of a social media platform to ensure that key messages around early language development are promoted widely. As part of the package of support at 12-15 months SLT continue to develop their services in relation to: drop in advice clinics, telephone advice resources for parents and signposting.</p>	Green	---	---	---	---	---	---

				Data	Period	Short (1 yr)	Med (3 yr)	Long (10 yr)	
01.03.03	Percentage of children with no speech and language concern at 27 - 30 months	Targeted work has focused on improving data collection and recording of the Health needs of Care Experienced children and young people including Speech, language and communication The current figures are showing an improving picture across each SIMD zone. SIMD 1 is evidencing an 6.6% increase in children with no concerns in speech, language and communication and the gap decreasing from 13.7% to 12.5% SIMD 1 76% 79.6 SIMD2 84.4% 86 SIMD 3 82.1% 86 SIMD4 84.7% 88 SIMD5 88.8% 92.1 (2017) (2018)	Green		79.6%	2019			
01.03.04	Workers in contact with families in early childhood and highlight the opportunity of 2 year old nursery places	Early Years partners have developed an approach that encourages positive, non-stigmatising language in the promotion of free early learning and childcare and highlights the learning and developmental benefits for 2 year olds. Positive relationships exist across Early Years staff, Health Visitors, Area Offices, child minders and other partners and has increased the awareness of places for 2 year old children amongst eligible parents. A 'Starting Nursery Booklet' is widely available and provides information about how to access a nursery place, this is due to be updated and reprinted in the next term. Data shows an increase in the number of eligible children attending nursery and self-evaluation evidences improving outcomes for families including - increased self confidence in parents, increased planning for children's learning and improved employability.	Green	---	---	---	---	---	---
01.03.05	Percentage of uptake of 2 year old places by those eligible	The percentage uptake of 2 year old places by those eligible was 10%, Of the uptake of all 2 year olds in priority groups 333 parents are in receipt of benefits.	Green		10.0%	2019

02.02.08	Percentage of parents participating in early years activities	Green		15.0%	2019			
	444 Tiny ACE memberships have been purchased to date. Engagement with Health Visiting teams to promote early year's opportunities, supported by free vouchers to encourage participation.							
02.02.09	South Lanarkshire Leisure will increase the quality and range of opportunities offered before, and after school and during lunchtime across sport and physical activity	Green	---	---	---	---	---	---
	The Active Schools programme has increased the number of young people accessing sport and physical activity and leadership opportunities within their own communities. Figures show an increase of 1277 young people accessing our programme last year figures. The third sector also contribute effectively to this agenda e.g. 1. Machan Trust provides assorted physical activities programmes some of which are delivered in partnership with Active Schools others are delivered independently 2. Healthy & Happy provide physical programme for under 5's 3. Liber8's StreetBase diversionary project provides evening and weekend access to assorted sport and physical activities identified by young people 4. Healthy Valleys provide a programme of outdoor play, health walks and exercise opportunities for children and families in need of extra support/SIMD 1 & 2 in community venue							
02.02.10	Deliver the Healthy Schools and Healthy Schools Plus initiatives in targeted schools and Learning Communities	Green	---	---	---	---	---	---
	There has been a lot of attention placed upon the implementation within South Lanarkshire over the last year 18/19, via mail drop school promotion, engage and presence within Learning Community Meetings all to make sure Healthy Schools was given an increased profile. As mentioned above, the on-going work within schools through Healthy Schools engagement has also afforded the opportunity to promote and deliver staff training. There are two separate targets attached here: Teachers CPD - set at 80 staff by March 2019 Healthy Schools Plus- set ay delivery to 4 learning communities by March 2019

				Data	Period	Short (1 yr)	Med (3 yr)	Long (10 yr)
03.01.07	Percentage reduction in the gap for destination outcomes for care experienced young people (linked to national average)	Care leavers (2018) 90% South Lanarkshire Average, 80.43% Scottish Average. The gap between care leavers and all South Lanarkshire leavers was 6.4% (reduced from 7.9% in 2018 i.e. a reduction of 1.5%) and compares favourably to the gap at national level which was 13.97% in 2018.		2%	2018			
03.02.01	Attainment for care experienced children and young people in line with national average and virtual comparator - Care Experienced young people obtaining 5 or more awards at level 5	The number of young people being measured is very low and therefore makes any comparison of yearly data difficult to do. Care experienced young people are not a homogenous group; they require bespoke packages that address their specific needs. It should be noted that while there appears to have been a reduction in the number of care experienced pupils attaining 5 National 5 awards, we have seen improvements for care experienced achieving National 3 and 4 awards, which should strengthen the ability of the young people to achieve National 5s. We have increased targeted support to care experienced young people in relation to transition pathways post school. More pupils are benefiting from dedicated Youth Employability support into options such as Foundation Apprenticeships and Gradu8 (work based learning programmes) with a view to strengthening career options. 90% of care experienced young people who left school in 2017-18 achieved a positive destination post school which is above the national average of 80.4%.	15.4	4.0	2018	22.5	23

03.06.08	All parents attending CAREs who are 1) on substitute prescribing and 2) have a child on the Child Protection Register have a wellbeing assessment in place by March 2020	Green	---	---	---	---	---	---
	Completed GIRFEC guidelines are in place for staff and bespoke training will be provided for all for all staff by July 2019. All children affected by parental alcohol and/or drug use are now seen by the CAREs service as potentially "in need" and possibly "at risk". When a client is referred to the service their assessment includes their ability to care for and look after their children. As part of this process contact is made with the Named Person (Health Visitor) for all parents who have children under five years of age and IT systems are checked to establish if there are or have been any child care concerns. When completing the Outcome Star staff consider where the client is on their journey of change and what this means in relation to their ability to parent effectively in relation to each of the star domains. These have been mapped with the GIRFEC well-being indicators and will be the focus of staff training in 2019/20.
